

e-POSTERS' LIST

REDOX & ENERGY METABOLISM CATEGORY

Poster n° 1

C2M2NF, a core model of central metabolism with carbon, nitrogen and folate pathways: application to one-carbon metabolism in cancer cells

Jean-Pierre Mazat,

Université de Bordeaux & IBGC-CNRS,
Bordeaux, France

Poster n° 2

Forced lipid catabolism entails higher proliferation rate of cervical cancer cells by ROS-dependent HIF1α activation

Serena Castelli,

University of Rome "Tor Vergata", Italy

Poster n° 3

Loss of Glutaredoxin-2 contributes to tumor oncogenic transformation via differential protein S-glutathionylation and hampering of oxidative phosphorylation

Monica De Luise,

University of Bologna, Italy

Poster n° 4

Mechanisms of resistance to ferroptotic cell death : the impact of bioenergetic pathways

Célia Gotorbe,

Centre scientifique de Monaco, Monaco

Poster n° 5

Mitochondrial complex I null cancer models reveal unspecific antiproliferative effects of complex I inhibitors

Ivana Kurelac,

University of Bologna, Italy

Poster n° 6

Pathogenic mitochondrial DNA mutations are associated with ROS signature and are prognostic markers in hepatocellular carcinoma

Camelia Alexandra Coada,

University of Bologna, Italy

Poster n° 7

Targeting the Fatty Acid Oxidation in combination with chemotherapy induces complete pancreatic cancer regression in vivo

Gabriela Reyes Castellanos,

CRCM, Marseille, France

Poster n° 8

Targeting the metabolic vulnerabilities of metastatic colorectal cancer

Josep Tarragó-Celada,

Universitat de Barcelona, Spain

Poster n° 9

The mitochondrial inhibitor protein IF1 of the ATP synthase modulates the permeability transition pore in a human cancer cell model

Valentina Giorgio,

University of Bologna, Italy

REDOX & HYPOXIA CATEGORY

Poster n° 10

Loss of SDHB, but not SDHD, promotes dysregulated iron and copper homeostasis, oxidative stress and vulnerability to ascorbate

Judith Goncalves,

U970, INSERM, Paris, France

Poster n° 11

Metabolic competition for glucose between tumor cells and T lymphocytes

Johannes Van Beek,

Amsterdam University Medical Centers,
Netherlands

Poster n° 12

Normal hematopoietic stem cells can exhibit metabolic flexibility similar to cancer cells

Alice Refeyton,

Inserm U1035, University of Bordeaux, France

Poster n° 13

Novel papaverine-based mitochondrial complex I inhibitor SMV-32 alleviates tumor hypoxia and radiosensitizes hypoxic tumors

Martin Benej,

The Ohio State University, Columbus, USA

Poster n° 14

Proline metabolism in Triple Negative Breast Cancer

Mehdi Zaroual,

IRCM, Montpellier, France

Poster n° 15

RIP140 inhibits glycolysis-dependent proliferation of breast cancer cells by regulating GLUT3 expression through transcriptional crosstalk: between hypoxia induced factor and p53

Catherine Teyssier,

INSERM U1194, Montpellier, France

Poster n° 16

The ATPase inhibitor protein IF1 in cancer cells exposed to anoxia mimicking condition favors survival and proliferation of re-oxygenated cells

Gianluca Sgarbi,

University of Bologna, Italy

METABOLIC PROFILING AND EPIGENETIC CONTROL CATEGORY

Poster n° 17

Duality of miR-22 in non-tumoral liver and hepatic cancer cells

Monika Gjorgjieva,

PHYME, University of Geneva, Switzerland

Poster n° 18

Nicotinamide opposes glioblastoma cell aggressiveness by inducing senescence and correlated changes in histone marks

Elias El-Habr,

INSERM U1130, Sorbonne University,
Paris, France

Poster n° 19

The mechanism of mycophenolic acid (MPA) Cytotoxicity

Drew LaBreck, UNMC,

Bennington, USA

SIGNALING, FUELING & METABOLISM IN CANCER CATEGORY

Poster n° 20

Alterations in glucose concentration shows new perspectives in gastric cancer metabolic studies in vitro

Emerson Lucena da Silva,

Federal University of Ceará, Fortaleza, Brazil

Poster n° 21

Association of lipid droplets accumulation with stemness and chemoresistance in pancreatic cancer

Alba Royo García,

Instituto de Investigación Sanitaria Aragón,
Zaragoza, Spain

Poster n° 22

Biomarker discovery through integrated models of patient metabolic and genetic fingerprints

Marta Cascante,

Biochemistry and Molecular Biomedicine,
Universitat de Barcelona, Spain

e-POSTERS' LIST

Poster n° 23

Cancer-associated fibroblasts promote drug resistance in ALK-rearranged lung adenocarcinoma cells through upregulation of cholesterol biosynthesis

Ann-Kathrin Daum,

Division of Cancer Genome Research,
DKFZ, Heidelberg, Germany

Poster n° 24

Characterization by mass spectrometry of the lipid metabolism in the different molecular breast cancer subtypes

Jose Adrià,

FUNCA, IISPV, Reus, Spain

Poster n° 25

Citrullination of pyruvate kinase M2 by PAD1 and PAD3 regulates glycolysis and cancer cell proliferation

Irwin Davidson,

Functional Genomics and Cancer,
IGBMC, Illkirch, France

Poster n° 26

Deciphering the role of the mitochondrial chaperonin MCJ in ovarian cancer

Stefano Miglietta,

University of Bologna, Italy

Poster n° 27

Definition of metabolic subtypes for pancreatic ductal adenocarcinoma stratification

Pilar Espiau Romera,

IIS Aragón, Zaragoza, Spain

Poster n° 28

Down regulation of dual specificity phosphatases upon methylglyoxal stress: impact on MAPK signaling in breast cancer cells

Akeila Bellahcene,

GIGA-Cancer, University of Liège, Belgium

Poster n° 29

Exploring serum metabolomics by advanced H-NMR profiling in breast cancer patients

Ylenia Ávivar,

URLA, URV, Reus, Spain

Poster n° 30

FABP4 and FABP5 play an important role in breast cancer progression

Jose Adrià,

FUNCA, IISPV, Reus, Spain

Poster n° 31

GlcNAc is a mast-cell chromatin-remodeling oncometabolite that promotes systemic mastocytosis aggressiveness

Fabienne Brenet,

CRCM - INSERM U1068, Marseille, France

Poster n° 32

Glioblastoma growth and invasion: when lactate dehydrogenases take the lead

Joris Guyon,

INSERM, LAMC, U1029, Pessac, France

Poster n° 33

Glycogen storage disease type III as a model to study glycogen driving tumor development

Valle Montalvo-Romeral,

Genethon, Evry, France

Poster n° 34

Impact of metabolic shift toward oxidative phosphorylation on metastatic process and cytotoxicity of natural killer cells against tumors

Noémie Dudzinska,

INSERM U1183, Montpellier, France

Poster n° 35

In silico analysis of identified proteins from HER-2 positive breast cancer cell lines resistant and sensitive to Trastuzumab treatment

Thais Fernandes,

INCA, Rio de Janeiro, Brazil

Poster n° 36

Integrated metabolomics and transcriptomics analysis of monolayer and neurospheres from established glioblastoma cell lines

Joana Peixoto,

I3S-Ipatimup, Porto, Portugal

Poster n° 37

LDL receptor-peptide conjugate as in vivo tool for specific targeting of pancreatic ductal adenocarcinoma

Angéline Acier,

CRCM, Marseille, France

Poster n° 38

Lipid metabolism supports the tumorigenic potential of pancreatic cancer stem cells

Patricia Sancho,

Translational Research Unit,
IIS Aragón, Zaragoza, Spain

Poster n° 39

Metabolic and immune features as predictive biomarkers of risk stratification of skin carcinoma

Léa Dousset,

INSERM, BMGIC, UMR 1035,
Bordeaux, France

Poster n° 40

Metabolic modules distinguishing glioblastoma cells in distinct functioning states identified from single cell analyses

Mirca Saurty-Seerunghen,

Laboratoire Neurosciences Paris Seine,
Paris, France

Poster n° 41

Metabolic plasticity in metastatic colorectal cancer in response to Palbociclib

Claudia Hernández-Carro,

University of Barcelona, Spain

Poster n° 42

Metabolic profile of tumor skin cells after low-level laser therapy

Tatiane Veloso,

Universidade do Estado
do Rio de Janeiro, Brazil

Poster n° 43

Metabolic vulnerabilities as predictive biomarkers and therapeutic targets in skin carcinogenesis

Pauline Michon,

U1035, INSERM, Bordeaux, France

Poster n° 44

Methylglyoxal, a by-product of glycolysis, modulates breast cancer immune landscape

Tom Wissocq,

GIGA-Cancer, University of Liège, Belgium

Poster n° 45

Mitochondria in human acute myeloid leukemia cell lines have ultrastructural alterations linked to deregulation of their respiratory profiles

Julie Mondet,

INSERM U1209/CNRS 5309/ CHUGA,
Grenoble, France

Poster n° 46

Mitochondrial fusion signalling elicited under stress by the β isoform of PI3K suggests a treatment strategy for KRAS-driven cancers

Julie Guillermet-Guibert,

CRCT, Toulouse, France

e-POSTERS' LIST

Poster n°47

Modulation of Nrf2-dependent antioxidant response after infection with Helicobacter pylori may contribute to gastric cancer

Océane Martin,

University of Bordeaux, France

Poster n°48

Multiplatinum resistance and metabolic plasticity in metastatic castration resistant prostate cancer (CRPC) and colorectal cancer (CRC)

Silvia Marin,

Universitat de Barcelona, Spain

Poster n°49

Non-metabolic functions of hexokinase 2 promote cancer stemness and oncogenicity by regulating an EMT-like phenotype and cell-extracellular matrix communications

Manon Watzky,

INSERM U1016,

CNRS UMR8104, Paris, France

Poster n°50

NOX4 regulates TGF β -induced proliferation and self-renewal in glioblastoma stem cells

Irene Golán,

Uppsala University, Sweden

Poster n°51

O-GlcNAc regulates tyrosine phosphorylation 105 site on PKM2: a mechanistic insight linking O-GlcNAc to Warburg effect in human alveolar adenocarcinoma

Patrícia Cruz,

Universidade Federal do Rio de Janeiro, Brazil

Poster n°52

OPA1, a new mitochondrial target in cancer therapy

Stéphanie Herkenne,

GIGA-Research, University of Liège, Belgium

Poster n°53

Pemetrexed hinders translation inhibition upon low glucose in non-small cell lung cancer cells

Marie Piecyk,

CRCL, Lyon, France

Poster n°54

Plasma fatty acids alterations in children with acute lymphoblastic leukemia

Maria Papadopoulou,

Aristotle University of Thessaloniki, Greece

Poster n°55

Protein kinase C regulates fatty acid metabolism in breast cancer cells

Daniele Vergara,

University of Salento, Lecce, Italy

Poster n°56

Pseudoprogression as a novel radiological sign of solid tumors underwent sonodynamic therapy

Ahmed M. Elsakka,

Cairo, Egypt

Poster n°57

Reduction of lipotoxic and carcinogenic impacts of adipose tissue by application of a combined physical training and diet

Anatolie Baciú, Kishinev,

Republic of Moldova

Poster n°58

Respiratory complex I deficiency triggers accumulation of lipid droplets and endoplasmic reticulum stress response

Luisa Iommarini,

University of Bologna, Italy

Poster n°59

Role of N-acetylaspartate in hepatocellular carcinoma

Pamela De Falco,

University of Tor Vergata, Rome, Italy

Poster n°60

Serine metabolism controls lung adenocarcinoma cells migratory ability by modulating AMP kinase activity

Amani Bouzidi,

Sapienza University, Rome, Italy

Poster n°61

Serum bilirubin levels and risk of cancer in the Swedish AMORIS cohort study

Maria J. Monroy-Iglesias,

King's College London, United Kingdom

Poster n°62

Silibinin mediated HIF-1 α inhibition restores oxidative phosphorylation in highly glycolytic nasopharyngeal carcinoma

Mehdi Bourouba,

University of Sciences, Algiers, Algeria

Poster n°63

Targeting the metabolic reprogramming associated with CDK4/6 inhibition as an effective combined therapy in colon cancer

Miriam Tarrado-Castellarnau,

Instituto de Salud Carlos III (ISCIII),

Barcelona, Spain

Poster n°64

The role of adipocyte G0/G1 Switch Gene 2 (GOS2) in the crosstalk between cancer cells and adipocytes

Christophe Deroanne,

University of Liège, Belgium

Poster n°65

Therapy-induced epigenetic inactivation of MCT1 renders tumor cells vulnerable for MCT4 inhibition

Catherine Vander Linden,

UCLouvain, Brussels, Belgium

Poster n°66

Transformation foci in IDH1-mutated gliomas show STAT3 phosphorylation and downregulate the metabolic enzyme ETNPPL, a negative regulator of glioma growth

Jean-Philippe Hugnot,

IGF, Montpellier, France
